Adventures In Gardening

How often have you been thrilled by the experience of growing rare, exotic plants gathered from all parts of the world? How often were your friends amazed to see flowers in your own garden which they never even knew existed?

Perhaps they stumbled upon a clump of Iris Reticulata and stood back in wonderment upon seeing an exquisite Iris, so miniature in size, as fresh and fragrant as a newly cut bunch of violets.

Or, maybe you surprised them with a group of dwarf Water-Lily Tulips which have the most unusual color combinations ever seen in any flowers.

Maybe it was a plant from the forbidden Himalays; from the tangled jungles of Africa; from a sea-swept coastland, or from a barren desert that captured their attention.

But no matter what plant it was, or what distant land it came from, it certainly cause a great deal of excitement in the neighborhood.

Can you recall that wonderful feeling you had when you saw those rare, intriguing plants in their full glory and heard the exclamations of your gardening friends and neighbors?

In my frequent travels I have always been filled with the desire to bring many of the fascinating plants I've seen to the attention of gardeners everywhere, as I have long realized that American gardeners have been deprived of many, many exotic and intriguing plants just because they are difficult to obtain.

Plant explorers from all parts of the world have been most eager to collect these beautiful and unusual plants for people like you who delight in growing them. Many have trekked through miles of jungles, cutting their way through dense, tangled undergrowth, with countless dangers lurking in the dark forbidden places traveled through. Other expeditions climed the high, brooding mountains of Central Asia, and even ventured behind the iron-curtain onto the plains of Siberia. Others were in Palestine, dodging bullets with every step taken.

While these adventuresome explorers have been covering the distant corners of the world collecting rare and exciting new treasures for your garden, other men of equal valor and enthusiasm have been patiently working to develop new creations from the old.

World-famous plant breeders and growers throughout North America, Western Europe, Australia and Africa -- in near or distant places all over the world -- have been working tirelessly for generations developing countless new varieties for you and your gardening friends; Exquisite new creations that are matchless in perfection, embodied with greater vigor and ruffedness, available in exciting new forms, new colors, and new beauty.

Through the combined and inspired work of these men of vision; the plant explorer, the grower and the hybridist; you are now able to enjoy a greater measure of pleasure and happiness from your own garden than ever before. Many are the fascinating varieties, rare species and new creations I have gathered together for you in the following pages --- providing you with the most unusual selection of flower bulbs in the world.

Before deciding on which of these subject you would like to have, you will undoubtedly want to select "basic" bulbous plants around which you will develop your garden plan. For these "basic" plants you should use the outstanding varieties listed and discussed in our manual, **FLORAL TREASURES OF THE WORLD** (our main catalog for the fall bulb planting season). The fascinating and beautiful subjects which I've collected together in **THE PLANT EXPLORER'S NOTEBOOK** should be used as "added attractions" to complete your basic garden requirements, giving your garden that extra sparkle, the charm and individuality, and exceptionally colorful displays that always bring exclamations of delight and admiration from your friends.

If you take pleasure in growing only the unusual, or if you like to specialize in a particular group of bulbs, you will find the wealth of material herein more than satisfying. Many of the most intriguing gems will not be found listed in any other American catalog.

Whether you're just beginning to explore these wonderous subjects or are a confirmed fancier, I urge you to use the listings in both **FLORAL TREASURES OF THE WORLD** and **THE PLANT EXPLORER'S NOTEBOOK** side by side. Then you will have a complete range of floral personalities from which to make your selections.

Whatever your gardening plans, you need these countless treasures to make your garden the most outstanding and beautiful in your neighborhood --- thus starting on adventures and explorations of your own that will lead to unknown heights of happiness, pleasure and excitement.

"Bon Voyage"

Beautiful NEW Floral Creations for 1951

For the past several years we have diligently been testing many new varieties and introductions in our test gardens in order to determine how well they perform and of what value that could be to our gardening friends.

We firmly do not believe that a variety should be offered just because it is "new". Our fundamental philosophy is that a garden should contain many plants which are rare and unusual and that those advancements which are most advantageous from the point of view of ease of culture, hardiness, and "newness" should be brought to your attention only after they have been subjected to a series of tests. These tests should remove any doubt as to how they will perform for you.

Those varieties which fail to meet all our maximum requirements are immediately discarded. Only those varieties which have passed all-out endurance tests have been selected for your use.

Many of the items in this section are being offered for the first time this season. Others have previously been offered one or two seasons ago. We have carefully sifted through all those varieties available and have selected only those which we feel are most outstanding.

You will find many other fine and choice items listed in other sections of THE PLANT EXPLORER'S NOTEBOOK and FLORAL TREASURES OF THE WORLD which are worthy of your attention. The listing which follows includes the choicest varieties and those which we feel should be planted more extensively.

All these varieties have our full endorsement.

All will give maximum performance.

All will make your garden a showplace.

NEW INDIAN BREEDER TULIPS

Of the many new Breeder Tulips which we have been testing, we have specially selected this group because of their many outstanding qualities. These tulips capture tints and tones which are seldom found in any tulips now being offered. Because of their rich, rare tones which are usually associated with our early American Indian, they have been called the Indian Breeders. Their unusually large flowers are borne on tall, stately stems which lend a bold, yet dignified effect to your garden.

CHAPPAQUA (33 inches high) A brilliant tomato-red with carmine-rose overtones. Inside of flower is a sparkling glaze, yellow base with blue edge. Creates an exciting show in the garden. Blooms mid-May.

EXCITING MODERN LILY CREATIONS

No garden can possibly be complete without a planting of Lilies. These are, without a doubt, THE Lilies to plant. Not only are they available in the widest range of colors possible, but they are also the easiest of all the Lilies to grow. They will multiply and thrive for you for many years and when once planted, require only the minimum amount of care and attention.

They are vigorous, robust and highly resistant to diseases and pests. They are the weather-resistant Lilies, since they do not easily succumb to differences in climate and temperature. Blooming at times when there are very few flowers in bloom.

AURELIAN SUNBURST HYBRIDS Luscious, lovely flowers varying from huge bowl shapes of white or cream with yellow or apricot centers -- to widely flaring or slightly reflexed flowers of usually yellow, yellow-orange, and light apricot. The flowers are of unusual texture and substance and are suitable for either garden or cut flower work.

Each \$2.95, 3-\$8.35

BELLINGHAM HYBRIDS A strain of lilies which has more than lived up to the hopes of the originators. This group is by far the most desirable of all the lilies for cut flower purposes and informal or woodland planting. Ideally spaced on tall, straight stems, the pyramidal flower heads bear up to 20 flowers. The color range is complete from clear yellow through the yellow-oranges to the bright orange-reds with scarlet tipped petals. Most of the flowers are intensely spotted with brown or reddish brown dots. Each 60¢, 3-\$1.60, 12-\$6.00

CENTIFOLIUM "OLYMPIC HYBRIDS" One of the finest of the new strains of hardy, trumpet type garden lilies produced in recent years. There is a pleasing variation among the individual plants of the strain, from the stylized typical trumpet shaped flowers to the more unusual forms, such as the widely opened bowl shaped flowers with petals artistically twisted and ruffled. A wide range of colors has been inherited from the parent plants, in addition to many exquisite new combinations, which include creamy trumpets, soft fuchsia pink, and the popular cool, icy greens. Exteriors of the petals are delicately shaded with light greenish brown or soft wine tints, and in some instances are a pure glistening white. All are July flowering, blooming later than *Lilium regale*, and their period of bloom extends from three weeks to a month. They do equally well in full sun or partial shade, and the dominant colors do not fade appreciably in the full sun. However, as with other Lilies, the flowers are at their best in very light shade, and when grown for show purposes should be given light shade as soon as the buds lengthen and begin to show color. Plant bulbs 5 to 6 inches deep in well drained soil where they can be left undisturbed for several years. Every hybrid is a majestic creation of breathtaking beauty, massive size, and noble proportions. Strong and vigorous in growth, easy to establish, and long lived. 5 to 8 feet in height. Available in a selected mixture of all colors and types.

Strong Flowering Bulbs-Each 45¢, 3-\$1.25, 12-\$4.50

Extra Select Bulbs - Each 60¢, 3-\$1.60, 12-\$6.00

CENTIFOLIUM "SPECIAL SELECT" Specially selected bulbs of the OLYMBIC HYBRIDS. All plants are individually selected and tagged in the field during the flowering season, and represent the choicest and finest of the entire crop. Each plant is superb exhibition quality and outstanding in all respects. General types included are the large formal waxy white trumpet, with either white or light pink exteriors - the wide flaring open bowl shaped type, usually with brownish or light greenish exteriors to the petals - and the very large irregular forms

with longer petals, usually slightly twisted or ruffled, giving the flower a most graceful informal shape. Supply is very limited.

Strong Flowering Bulbs (Random Sizes Only) -
Each \$1.10, 3-\$2.95, 12-\$10.95

CENTIFOLIUM "PINK SELECTIONS" Once in a while a pink "sport" or mutation appears in a trumpet Lily which is so unique and different that it is used in intensive hybridizing programs to produce a lily which accentuates this unique color. All are robust giant trumpet lilies of unsurpassable magnificence. The colors range through shades of fuchsia and rose-pink. Only a limited quantity available.

Each \$3.00, 3-\$8.00, 12-\$30.00

FIESTA HYBRIDS As cheerful and gaily colored as the name implies, this new race of seedlings has dainty neatly reflexed flowers of typical Turk's Cap form, nicely spaced on thin wiry stems 4 to 6 feet in height. Extremely uniform as to flowering time and habit, with pleasing variations in color and form of flower which enhance their beauty and usefulness. Colors range from bright yellow, through orange and copper, to bold and beautiful rich reds, providing a most brilliant display of unusual charm. Many of the plants have blossoms facing outward or somewhat upward with petals only slightly recurved. A sun-loving group, plant them 5 to 6 inches. Excellent cut flowers, as stems are easy to handle and arrange, and colors are particularly attractive indoors. Of easy culture, and absolutely hardy. Available in mixture only.

Strong Flowering Bulbs-Each 75¢, 3-\$1.95, 12-\$7.30
Extra Select Bulbs-Each 95¢ 3-\$2.75, 12-\$9.50

oooooooooooo FIRE KING oooooooo

Imported direct from C. G. Tubergen, Ltd.,
Haarlem, Holland

This most strikingly brilliant and handsome lily is a cross between a seedling of *L. Willcroidii* and a form of *L. Umbellatum*. We consider it the most showy of the new valuable hybrids. It possesses an excellent constitution and is destined to become a very popular garden gem. The stiff, sturdy stems bear long, closely cut spikes of large and shapely fiery-red flowers. These are carried with their axils horizontal so that the wide open flowers look at you, thus displaying themselves to the greatest advantage. Because of this horizontal carriage of the flower and its extraordinary substance, it does not "burn" in the hot sun, and possesses long lasting qualities. It flowers in early July and reaches a height of $2\frac{1}{2}$ to $3\frac{1}{2}$ feet. Plant 4 to 5 inches deep in average garden soil with good drainage.

Each \$2.10. 3-\$6.00-12-\$21.00

GOLDEN CHALICE HYBRIDS Specially selected Golden-yellow forms of the Rainbow Hybrids. Superb lilies of vigorous quality and substance, flowing with health. Grand garden plants which increase rapidly. Each 90¢, 3-\$2.50, 12-\$9.00

It increases at an amazingly rapid rate. Each \$1.00, 3-\$2.75

GREEN MOUNTAIN HYBRIDS Unusually sized trumpets which combine a green coloring of the throat and a brown shaded exterior. Quite distinct in shape and color. They are definitely a superior group particularly valuable for exhibition and specimen planting as well as a magnificent cut flower. Each 95¢, 3-\$2.55

CHARMING, DAINTY MINIATURE CROCUS SPECIES

Spring-Flowering Crocus Species are dainty, little flowers which commence blooming long before the large-flowered Dutch varieties. They usually unfold their exquisite blooms in March and April, but some will boldly appear even during February should there be warm thawing spells of weather. Thus we can easily lengthen our gardening year by planting several of these early-blooming species. We cannot guarantee that the rhizomes and bulbs of all the Iris Species we list will be of blooming size. Many are extremely rare and difficult to obtain. For many of these varieties, we have to depend upon plant collectors in various parts of the world to supply us with plants. It is not always possible for these collectors to locate large, blooming size rhizomes and bulbs.

Because of their extreme scarcity, we have all the Iris Species shipped directly to us. They are carefully sorted in our warehouse and we ship the largest roots available of each species to our customers.

Every bulb or rhizome is guaranteed to be a perfect, healthy specimen, and is subject to your approval upon arrival. Any which do not produce strong healthy growth next year will be replaced at no charge the following fall.

If your bulbs or rhizomes do not produce blooms the first year, we urge you to continue growing them with the very best of care for they will assuredly bloom for you the next season.

Customer Service

You're right Mike,
I'm just an easy going, old plain dirt gardener who can't resist helping out a fellow gardener. Have finally given in to the magazine publishers and agreed to share our popular POT LUCK program with their garden readers.

You know I have always felt this wonderful opportunity should be reserved for our own customers only. But when they asked me if a real (true) gardener would ever have the heart to deprive any fellow gardener of something really good, I just had to give in.

That's the story Mike. And I'm attaching a printer's proof of the POT LUCK advertisement just as it will appear in several leading garden magazines the latter part of this month.

But we must protect our customers first. We'll be swamped with more orders than we can possibly fill once the gardening public hears about it. And we have to do something fast. The October issues of these magazines will be in the hands of the general gardening public around the 25th of September.

Let's talk this over at lunch today, Mike. I want to work out a quick plan so our customers can send their orders in first.

Julian

And by the way! I received a grand letter from Mrs. Johnson this morning thanking me for the wonderful help you gave her on her growing problems. She included the names of two of her best gardening friends and requested catalogs for them.

Otherwise we will assume this proof O.K.
